

Mahmoud Nagah Mousa

Senior Backend Engineer | PHP & Laravel | REST APIs | MySQL | Scalable Backend Systems

Egypt • (+20) 114 203 6896 • Mahmoudnagah999@gmail.com • [mahmoud-nagah-mn999](https://github.com/mahmoud-nagah-mn999) • [MahmoudNagah999](https://www.linkedin.com/in/MahmoudNagah999)

PROFESSIONAL SUMMARY

Senior Backend Engineer specializing in PHP/Laravel, with 4+ years of experience building and maintaining production SaaS and enterprise systems. Strong experience in REST API development, backend architecture, security, performance optimization, legacy refactoring, and complex business workflows.

PROFESSIONAL EXPERIENCE

Restart Technology | Senior Backend Engineer

Jul 2025 – Oct 2026

Laam — School Management SaaS Platform

- Developed and maintained RESTful APIs for Laam, a multi-tenant school management SaaS platform supporting **3 web dashboards and 2 mobile applications** for students, teachers, school employees, and parents.
- Served as the primary backend owner for the **Administrative and Parent mobile applications and Teacher Dashboard**, implementing core workflows including attendance, schedules, teacher assignments, parent-student relationships, and school management.
- Implemented the school's **7-step onboarding workflow**, including student and teacher data imports using Laravel Excel and queued jobs, and integrated Nafath APIs for parent identity verification.
- Refactored legacy backend areas using **Service Layer architecture** to move business logic out of oversized controllers and reduce duplicated logic across controllers, improving separation of concerns and maintainability.
- Strengthened tenant-level security by adding **school ID to JWT claims**, preventing users from accessing data belonging to other schools through manipulated client-provided identifiers.
- Resolved **N+1 query issues** across multiple areas of the platform through eager loading and query optimization; reduced the final onboarding step from approximately **55 seconds to 7 seconds**.
- Developed and maintained automated tests using **Pest and PHPUnit** to verify backend functionality and help prevent regressions.

Next & Associates | Software Engineer

Sep 2024 – Jul 2025

FilmSA — Saudi Entertainment Content Platform

- Took primary responsibility for the **CMS implementation**, building the CRUD functionality used by the platform's main dashboard with Laravel and Filament.
- Proposed and implemented **Filament** for the CMS based on its CRUD-heavy requirements, enabling faster development of the administration interfaces.
- Applied the **Service Pattern** to organize business logic and maintain separation between application layers.

Daem — Saudi Stock Market Platform

- Developed backend functionality for a financial platform serving the Saudi stock market sector, using **Laravel alongside Python/Flask services**.
- Designed and implemented a **Python/Flask web scraping component** to collect market and sector data from the Saudi Exchange website.

- Built the **yfinance integration** to retrieve additional financial market data and sector-related indicators.
- Used **PostgreSQL** to store and process the collected financial data.

ETOLV | Laravel Developer

Oct 2023 – Oct 2024

- Developed and maintained a live tourism ERP platform used across **100+ departments** and serving **5,000+ end users**.
- Maintained and enhanced a legacy backend built with **Laravel/Lumen**, investigating and resolving a wide range of production issues across application logic, database/data handling, and APIs .
- Worked directly with **Neo4j** as the primary database, writing **Cypher queries** and applying graph-based data modeling and data relationships within the existing system
- Took full ownership of **Massar Hajj**, a dedicated module for managing Hajj allocations and traveler bookings, and built it **from scratch** based on requirements gathered directly from the department manager.
- Designed and implemented the module's backend architecture, business logic, and APIs, including **Hajj trip booking and allocation tracking**, with workflows to compare allocated versus consumed capacity.

CLAVIS | PHP Developer

Mar 2021 – Nov 2021

Previous: Laravel Intern | Jan 2021 – Mar 2021

- Started as a **Laravel Intern during the final semester of university**, contributing to the development and customization of a CRM platform for club management.
- Continued as a **full-time PHP Developer**, working primarily on the company's existing **Vtiger CRM platform** used to manage operations for social and sports clubs.
- Developed new features, customized CRM functionality, and resolved bugs based on business and operational requirements.
- Worked with **Vtiger CRM, PHP, Laravel, and MySQL** while gaining hands-on experience maintaining and extending an existing production-oriented system.

TECHNICAL SKILLS

- **Backend:** PHP, Laravel, Lumen, RESTful APIs, Service Layer Architecture.
- **Architecture & Practices:** SOLID, Clean Code, Legacy Refactoring, Query Optimization, Code Review.
- **Authentication & Authorization:** JWT, Spatie Permission, RBAC.
- **Testing:** Pest, PHPUnit.
- **Database:** MySQL, PostgreSQL, Neo4j
- **Laravel Ecosystem:** Eloquent ORM, Laravel Queues, Laravel Excel, Middleware, Observers
- **Tools:** Git, GitHub, GitLab, Jira, Postman, Docker, Jenkins

EDUCATION

Helwan University

B.Sc. in Computer Science & Artificial Intelligence

Sep 2016 – Jan 2021
